

A blue helicopter is shown in flight, viewed from a low angle looking up. The helicopter is positioned on the right side of the frame, with its main rotor blades blurred from motion. The background consists of a vast, snow-covered mountain range with numerous evergreen trees. The sky is a clear, pale blue. The overall scene conveys a sense of adventure and high-altitude travel.

An experience like no other

Who needs a chairlift when you have a helicopter?

For many, heli or cat skiing is the ultimate form of the sport. You're guaranteed to ski on untouched snow far from the crowds, amid truly spectacular scenery.

Cat skiing involves transport up the mountain on what you'd normally know as a piste basher, while a helicopter offers a fast and breathtaking way of accessing freeskiing paradise. Whether it's cat or heli, it is quite simply an unforgettable skiing experience.
